# electric powered access

As a world leader in all-terrain working machinery, MANITOU is known for **INNOVATION, SAFETY and the QUALITY** of its product ranges. MANITOU designs and manufactures products **precisely adapted to the needs of its clients** (in construction, agriculture and industry). **Reliability, performance and simplicity of MANITOU** machines combine to make equipment of enhanced value. So it is natural that Manitou should bring all its expertise, and that of its network, to develop **electrical powered platforms specifically adapted for industry**.

You will find a **wide choice of platforms**, each perfectly suited to the needs of your business, whether for indoor or outdoor use, and whether you are a hirer or an operator. MANITOU also guarantees rapid and effective support. **Every situation is planned for.**

## Electric platforms a range of **11** models

V

VJR

AETJ

SE-SEC

# Vertical platforms

3 MODELS AVAILABLE:

( 60V )

( 80VJR )

( 100VJR )

## Compactness and manoeuvrability to ensure maximum utilisation.

You can work with ease up to a height of 10 m with our vertical platforms. They are **compact, light and manoeuvrable**, hence ideal **to access the most difficult places**. You can efficiently carry out your handling or maintenance operations **indoors and also outdoors on firm ground**.

**“ I can easily get to  
wherever I wish to be  
in complete safety. ”**

# Vertical platforms

60V / 80VJR / 100VJR

## High accessibility

You gain in manoeuvrability in confined spaces by virtue of the limited space requirement of our vertical platforms. No matter which model, access to a building via a standard door is no problem.... You no longer require ladders or scaffolding, you can carry out your maintenance operations simply and safely. Our range of platforms is light, hence easily transportable, so you increase the time available to work fully independently.

## Minimal maintenance

You significantly reduce costs of maintenance. The telescopic system is recognised by our clients for its reliability, and robustness but also for its ease of maintenance. There is easy access to the batteries, notably with the 60V model, due to the sliding drawer (no screw to undo). Maintenance is therefore even more rapid.

most suitable working  
areas  
for the **60V**

- Industrial maintenance
- Maintenance of equipment in public/municipal establishments
- Preparation of orders
- Finishing-off work
- ...

Public spaces: museums, hotels

Warehouses

Large storage areas

**“ Even in cluttered  
spaces, I can work  
in a large area  
without restriction. ”**

# Vertical platforms

60V / 80VJR / 100VJR

## Safety and stability

You can work at a height or in congested spaces without difficulty. Each model has **high stability** which our engineers have made possible through working on the dimensions and the positioning of component parts. **Comfort and stability** in the platform (basket) are achieved through the telescopic tube technique developed by MANITOU.

Although very compact, our VJR models function over a large working area, and have **the best capability for reach** on the market, due to the pendular arm and rotating turret.

## Intuitive controls

Your machine is easy to operate. The controls were devised **to be manipulated quickly and easily**. Movements are made precisely and neatly due to proportional controls. You can work **in total safety and comfort** within the spacious baskets in all our range of vertical platforms.

## Most suitable areas for **VJR**

- **Second-phase outdoor work** (on firm ground): painting, sign-fixing
- **Second-phase interior:** Air-conditioning, insulation, fire-detection systems, lighting, electric wiring, piping
- **Industrial applications:** Cleaning, warehousing, supermarket chains, production industries, industrial maintenance, stock-checking
- **Public buildings, gymnasiums etc.**
- **Agricultural Storage**
- ...

Sports arenas

# Articulated platforms

5 MODELS AVAILABLE:

( 120AETJ-C ) — ( 150AETJ-C ) — ( 170AETJ-L ) — ( 150AETJ-L ) — ( 170AETJ-L )

## You can work around all obstacles, indoors or outdoors.

If you work in restricted and congested places such as warehouses, production areas, pedestrian zones, this range is the ideal solution. **Height, weight, manoeuvrability, multi-purpose application...** The self-propelled articulated electrical MANITOU platforms will answer all your needs, outdoors or indoors. **This can be in the 3D version for even more accessibility, or the Bi-Energy version for greater independence...** The choice is yours to find **the model best adapted to your conditions.**

**“I enjoy freedom  
of access and  
movement beyond  
compare.”**

# Articulated platforms

120AETJ-C / 150AETJ-C / 170AETJ-L / 150AETJ-L / 170AETJ-L

## Compactness and lightness

All our models are under 2 metres high with arms folded back and thus you can easily access all industrial buildings. The models designated 'compact' allow access to **very small or cluttered places**, and enable their ability to place objects in industrial sites. Our models **are easily transported** and offer excellent stability.

## Turning circle, overhang, height

You can reach the furthest places with ease whichever model is used. The 120 AETJ-C has the **best turning circle to compactness ratio in its category**. The 170 AETJ-L is noted for its **exceptional turning space and minimum overhang** when working without the need to move the machine. The pendular action greatly increases the size of the work area.

## 3D option

The 120 AETJ-C and 150 AETJ-C have the 3D pendular action and thus allow you to negotiate **flexibly around** obstacles such as piping, beams or pillars. This rotation system significantly increases your accessibility and working space for enhanced **productivity**.

## Most suitable working areas for **AETJ**

- **Second phase work:** air-conditioning, insulation, fire-detection systems, lighting, electric working, plumbing, fitting of windows, signs
- **Industrial use:** cleaning, warehouses, production areas, industrial maintenance
- **Placing of signs, gymnasiums etc.**
- **Building, renovation.**
- **Aeronautical industry:** inspection, maintenance, repairs
- **Temporary events:** preparation of exhibitions, entertainment/shows
- ...

Airports

Warehouses

“For my work, indoors and out, **everything** is under control.”

# Articulated platforms

120AETJ-C / 150AETJ-C / 170AETJ-L / 150AETJ-L / 170AETJ-L

## Robustness

You can count on your machine for a long working life. The reinforced structure of the arms increases the **rigidity** and the **comfort for the operator** through a well-balanced basket. On the ground, this stability equals **safety**, **whatever the height of working and the turning circle.**

## Safety at work

You can work in total safety. The AETJ platforms are equipped with safety **protection that complies with European safety directives:**

- the incline detector (elevation is automatically cut out if the gradient is greater than 3' or 5')
- the charging control
- the operating lever inside the basket and on the ground
- the system of negative braking (it requires a positive movement of the switch to be released)
- the safety pump to allow the operator to descend rapidly in case of emergency.

## Intuitive switches

You can easily operate your machine with the aid of intuitive proportional switches, which are ideal for **rapid application. The movement from above can be made neatly and safely.**

## Most suitable working areas for **AETJ**

- **Second phase work:** air-conditioning, insulation, fire-detection systems, lighting, electric working, plumbing, fitting of windows, signs
- **Industrial use:** cleaning, warehouses, production areas, industrial maintenance
- **Placing of signs, gymnasiums etc.**
- **Building, renovation.**
- **Aeronautical industry:** inspection, maintenance, repairs
- **Temporary events:** preparation of exhibitions, entertainment/shows
- ...

Industrial sites

**“I can carry out  
more work  
without moving  
my machine.”**

# Articulated platforms

120AETJ-C / 150AETJ-C / 170AETJ-L / 150AETJ-L / 170AETJ-L

## Comfort on the working platform

With the AETJ range you can be sure of good working conditions. Our baskets are **spacious, robust and safe**. The floor of the **platform is light-admitting** to improve ground visibility, and the **double handrails** enable you to avoid trapping your hands. Your **tools are always within reach**, thanks to the tool-racks. The drive lever can be **protected from being soiled during dirty operations** by a cover which ensures that your machine stays in good condition so as to **achieve a better resale value**.

## Independence

You increase your productivity with the **traction batteries**. Their independence and longer life respond to your need for intensive operation. The indicator on the control post allows you to check easily the state of charge of your machine.

## Simplified maintenance

The **integrated CAN-bus technology** facilitates a **rapid diagnosis** of the condition of your platform immediately and on-site. Furthermore, access to different components is easily facilitated enabling you to reduce the time the machine is out of use.

## Most suitable working areas for AETJ

- **Second phase work:** air-conditioning, insulation, fire-detection systems, lighting, electric working, plumbing, fitting of windows, signs
- **Industrial use:** cleaning, warehouses, production areas, industrial maintenance
- **Placing of signs, gymnasiums etc.**
- **Building, renovation.**
- **Aeronautical industry:** inspection, maintenance, repairs
- **Temporary events:** preparation of exhibitions, entertainment/shows
- ...

Second phase work

Building sites

“I’m always **self-sufficient right from the start.**”

# Articulated platforms

120AETJ-C / 150AETJ-C / 170AETJ-L / 150AETJ-L / 170AETJ-L

## You increase productivity !

The Bi-Energy system is an **innovative process** which combines the silent and non-pollutant working of electrical technology with the autonomy of a Diesel engine. No longer is there a need to return to the charging station. Ideal for **intensive applications** which require indoor and outdoor operation.

## Long-term effect

The Diesel engine drives a generator which **transmits energy to the batteries**. You gain in independence from all electrical sources. When the batteries have run down, the engine takes over, allowing you to work while at the same time recharging the batteries.

## Usage inside and outdoors

The Bi-Energy platforms are truly **adapted to changes in environment**. You pass very easily from the **electric mode** working **indoors** (non-polluting, more economical) to the **Diesel mode** **outdoors**.

## Partial all-terrain models

The Bi-Energy models are fitted with semi-industrial tyres at low pressure. You can work outdoors on **non-firm ground**, and **indoors, without damage to the ground**. With their capacity for adhesion to the ground they facilitate safety of movement.

## Most suitable working areas for **Bi-Energy**

- **Second phase work:** air-conditioning, insulation, fire-detection systems, lighting, electric working, plumbing, fitting of windows, signs
- **Industrial use:** cleaning, warehouses, production areas, industrial maintenance
- **Placing of signs, gymnasiums etc.**
- **Building, renovation.**
- **Aeronautical industry:** inspection, maintenance, repairs
- **Temporary events:** preparation of exhibitions, entertainment/shows
- ...

# Scissor platforms

3 MODELS AVAILABLE:

( 78SEC )

( 100SEC )

( 120SE )

## How to maximise your higher-altitude work.

The MANITOU scissor platforms have a **high working capacity** and **extendable working area**. No need to ascend and descend repeatedly: you can **control everything**, without risk, **from the platform**. This type of platform is ideal for reaching restricted spaces while also bringing the materials necessary for work at a high level. Your tasks are completed in safety.

“I can get in  
everywhere  
without **lack**  
of space in  
the basket.”

# Scissor platforms

78SEC / 100SEC / 120SE

## High accessibility

Workplace aisles and difficult-access places are no longer an obstacle. Equipped with a narrow chassis, the 78 and 100 SEC models can **easily pass through a standard door**. As for the 120SE model, it needs a width of 1.20 m. **You increase your manoeuvrability** in restricted spaces due to the small turning circle and the exceptional reduced overall dimensions.

## Intuitive controls

You can operate your machine with ease due to the **intuitive controls**. The flexible and easy driving of the machine ensures that you have comfort and safety. The indicator on the control panel allows you **easily to check the state of charge of your machine**.

Suitable working areas for **SEC/SE**

- Second phase: painting, lighting, wiring, insulation, air-conditioning
- Industrial cleaning
- Stock checking
- Special events (exhibitions/Shows - outdoors)
- ...

Production sites

Building sites

Offices

**“I carry out my work  
at high level with all the  
equipment I need.”**

# Scissor platforms

78SEC / 100SEC / 120SE

## Self-sufficiency

Keep your work going longer: our scissor platforms have the **ECU** (Electronic Control Unit) system which improves the efficiency and longevity of the battery. You will increase productivity.

## Robustness and safety.

You can work in confidence at 7.8 m, 10 m or 12 m. The 78/100 and 120 are equipped with double scissors with reinforced arms with increased dimension axes. An anti-slip coating on the basket also contributes to your safety.

Suitable working areas for **SEC/SE**

- Second phase: painting, lighting, electricity, air-conditioning, insulation
- Industrial cleaning
- Stock-taking
- Temporary events
- Logistics
- ...

Building sites

# Services MANITOU

## Proximity and availability as you require

**The infrastructure is at your service!** In addition to geographical proximity, you can rely on the technical expertise and advice of your MANITOU agents, at the time of purchase, and throughout the life of your machine. To help you work in the best possible conditions, MANITOU provides you with the best possible speed of delivery of spare parts for your equipment.

## Responsiveness and technical expertise which you need from a supplier

For the technical follow-up on your equipment you can rely on experienced professionals! You also can have the peace of mind of every MANITOU owner by calling on MANITOU experts, regularly retrained over the range of our products and available to answer your questions, whether you are an owner-operator or hirer. Maintenance and repair works are carried out on site following a simple telephone call, and in the time-frame agreed, According to your system of management you can plan and spread your maintenance charges and benefit from our offers of maintenance contract and/or extension of guarantee.

## Made-to-measure financing to protect your budget

You can plan the purchase of your platform with peace of mind using the MANITOU financing schemes. You have access to solutions that are simple and adapted to your needs and to the season. If you wish to make a speedy investment without exceeding your available funds, you should consider asking us for a tailor-made approach which takes your financial situation into account.

\* Manitou finance solutions available in certain countries.

(varies according to options & standards of the country)		
<b>Batteries</b>	300 Ah / 2 x 24 V	
<b>Integrated charger</b>	45 Ah / 48 V	
<b>Engine</b>	Lombardini FOCS 702 water cooled	
<b>Power</b>	9.20 kW	
<b>Generator</b>	5.70 kW / 48 V - 100 Amp / 2500 rpm	

## Standard equipment

- Proportional switches/levers
- Forward movement possible at maximum height
- Sound and visual alarm in case of excessive slant and overload
- Integrated charger
- Emergency manual descent
- Negative braking system
- Sound warning system inside the platform
- Hour meter
- Indication of state of charge of batteries
- Hooks for sling loading/lifting
- Integrated diagnostic aid
- Predisposition 220V
- All road wheels - Non marking
- Basket with transparent floor
- Bus CAN technology
- Tool box inside platform

## Optional equipment

- Flashing lights
- Working light
- Predisposition of air
- Predisposition of water
- 230V power input with differential circuit-breaker
- Special paint
- Biodegradable oil
- Central topping up of batteries
- Warning signal moving forward
- Warning signal for all movements
- Initial certificate of verification prior to entry into service
- Safety harness
- Oil for extreme low temperatures
- Battery frost protection
