

GO WHERE NO BOOM HAS GONE BEFORE

WITH CONFIDENCE AT 56.6M

PRODUCT INTRODUCTION: 1850SJ

Introducing the biggest telescopic, self-propelled boom lift to ever hit the market. The 1850SJ features 19 stories of working height and almost 82.000 m³ of work area.

Heightened Productivity

The 1850SJ is much faster at full height, so operators can spend more time working and less time positioning the boom. The axles take approximately one minute to extend/retract.

Greater Work Envelope

Telescoping jib provides 82.000 m³ of work area and greater ability to reach up and over. An LCD screen shows operators where they are in the work envelope along with other troubleshooting codes.

More Capacity

Featuring dual capacity of 450 kg/230 kg, the 1850SJ is the highest reaching, self-propelled boom lift in the industry.

Key Specs

Platform Height:	56.56 m
Platform Capacity:	450 kg/227 kg
Working Height:	58.38 m
